Thread: [Residential proxy?](#)

Edmo. - March 10, 2024, 3:25 pm

Hi all,

If any of you remember browser game Gladius - I started playing it again.

Thing with the game is that for Europe they give one price of rubies, and for Turkey they give cheaper prices.

EU - 5000 rubies = 200€

TR - 5000 rubies = 26€

How to avoid this? I have already tried some proxies from proxy-seller, I have tried VPS from PqHosting - all with Turkey IP addresses, but somehow gameforge system detects it all and doesn't give me prices in Turkish lira.

Any of you knows how to do this?

Thanks

Charlie Sheen - March 10, 2024, 4:45 pm

Is it asking for location permissions?

Edmo. - March 10, 2024, 4:55 pm

(Mar 10, 2024 04:45 PM)Charlie Sheen Wrote: [\[CITE\]](#) Is it asking for location permissions?

No, It's browser based games and It doesn't ask for any permissions.

I've also created new account on new email while using Turkey VPS, but It doesn't give me their prices.

Are you using a Turkish VCC?

Edmo. - March 10, 2024, 5:14 pm

(Mar 10, 2024 04:57 PM)Charlie Sheen Wrote: [\[CITE\]](#) Are you using a Turkish VCC?

No, I haven't gotten to CC yet. Before buying you can see prices and select how much you want to buy.

I have also tried using undetected browser on VPS.

7 - March 10, 2024, 5:43 pm

Are you using residential proxies in turkey?

If not use proper residential proxies such as those found on nsocks

Message me, Ill give you one to try

I have sent you one via Convo to test

Use an undetectable browsers also and set the GPS locations manually to be sure

Let me know if it worked,
Kind Regards

This worked!
After a month of searching, this has been solved within minutes.

Thanks!

Gftyfeer - May 29, 2024, 10:14 am

Hi, this solution work for me only in new account, have you done this on existing one?

I am selling Course for cheap turkey rubies .

The Course include all the knowledge & tools that will help you to buy cheap rubies in your existing account/new accounts.

All my students get free mentorship with me anytime.

The course price is 299\$

Mateusz Blaster - November 29, 2024, 6:03 am

Hello everyone

My problem is exactly like this guy on top

I was using free vpn, paid vps, paid proxies (normal) and nothing work. And today I came across this topic. My problem is the same, im from europe and i want to buy ruby in native turkish currency.

Im started search residential proxy but i dont know what to search, for what im need to look? Socks? rotation proxy, static proxy? I dont know.

If anybody can help me, guide me and explain what's going on i will be grateful.

Which residential proxy i need to search? maybe vpn will work somehow? like mullvad or something.

Im waiting for your response guys, please help me.

visit sites like "pixelscan.net" or "whoer.net" or "f.vision" and see if your DNS or WEBRTC is leaking. Maybe its due to a leak.

SIM-5594896 - December 2, 2024, 10:26 am

Hi!

Is the point of it all to sell the rubies afterwards?

opsondell - February 6, 2025, 9:19 am

you should never buy vpn in traceable way

otherwise you just logged yourself

Were you testing data center ip's or residential/mobile ip's? There is a big difference between these.

You get some residential proxies (IP from Turkey), You would save more money paying for some proxies and then buying them rubies.

Contact us and we will test to make sure which proxies would work best for your use case.

Hi 7,

Any pointers on a good / usable residential ip? I'm having a lot of trouble with providers. I've bought from quite a few cheap ones but they are all busted on ipqualityscore.com.

I'd appreciate some good advice. The sellers forum is full of resellers and I'm finding it hard to choose

MRROBOT666X - November 30, 2025, 1:33 pm

I have the same issue. is there free options for these proxies? I checked a site and they want to charge me 28\$..

I just want to test first if it works at all

(Mar 10, 2024 03:25 PM)Edmo. Wrote: [\[CITE\]](#) Hi all,

can you help me get it to work? i can even pay you if it works

gladius7249 - March 4, 2026, 1:34 pm

Up

Hey guys, is it possible to test the proxy method to see if it really still works or not ?

And also if it works on existing accounts or not ? Thanks a lot
