Hi, y'all I'm Misnomer here to contribute and maybe learn a thing or two. Thanks to those whom contribute and provide awesome tutorials, posts and content for our enjoyment. Anyway, if anyone wants to suggest posts to software, tutorials or development threads. I'd be extremely grateful. As I said I'm new to the forum and would like to further my programming and technical skills via this community. Thanks for everything and for any suggestions beforehand. God bless and happy shell swapping!
