I would like to travel more. I think family should be first.

Family and friends is nice to have.

On a plane, I prefer travelling alone. On a train, I don't care either way, but it also depends on if we get a room aboard or just coach. If coach, then I'd rather travel alone and hope I get an empty seat next to me.

I never travel since I have to deal with extreme agoraphobia. If I were going to, it would be with the gf if I had one at the time.

Basically can't leave my house without panic attacks and extreme anxiety.

I always love to build memories with my family and I want to spend all of my travels with my love ones ?

I like traveling with my family, but probably my step-brother the most.
