FREE AI IMAGES

Sponsored by: [Fallen](#)

Hi all, happy Fallen Friday!

This giveaway is available for all users, even non-upgraded. If you aren't leet or uber, today's your chance to get an AI generated avatar or another type of image from me.

I may not be able to respond to all requests until end of day or tomorrow, but I am only fulfilling requests from today, Friday 3/15/2024.

Examples of avatars:

Please try to be specific with what you want so it's not too general, but keep in mind AI isn't going to hit 100% of your requirements every single time. I will re-prompt and send multiple sets if I can, but want to make sure everyone can get a set of images :)

Come and enjoy some of the best AI from one of the best prompters' I've ever seen.

let me know if these are too cutesy:

This one is kind of spelled wrong, but depending on how you look at it, the letters are there but just merged together in a way (the dot of the i over the m for example):

here are some I could replace or remove text on if you like 1 - but not really 'banner' size:

Message me if you want anything more, I'm closing this thread due to Fallen Friday being over. Was hoping for more activity in this thread, glad to have helped you though! Sorry for the delay <3
