Thread: [Weekend 3d printing warriors](#)

TooBurnt - March 16, 2024, 11:13 am

Who else pretty much only gets to run their 3d printers on the weekends due to their jobs during the week? I build up a list of all the prints I want to make throughout the week then when Saturday and Sunday come around I print like a mad man.

Any other weekend 3d printing enthusiast out there and what's on your list?

Jamika - March 16, 2024, 11:16 am

I just saw a sale for a ender for like \$100. IDK where you are in the world or if it would apply. There's some cheap printers out there that can produce some decent quality prints. I currently have a elegoo and I really want to upgrade a prusa or Bambu labs.

Is your printer a resin printer or can you do other materials as well?

Undead - March 16, 2024, 2:43 pm

What kind of things do you print with it?

TooBurnt - March 16, 2024, 2:52 pm

(Mar 16, 2024 01:35 PM)Euaggelistes Wrote: [\[CITE\]](#) Is your printer a resin printer or can you do other materials as well?I have what's called FDM. It's the pla filament using printer. I'm not a fan of the complicated process that is resin printing. FDM can just slice and print.

(Mar 16, 2024 02:43 PM)Undead Wrote: [\[CITE\]](#) What kind of things do you print with it?I print all sorts of things from cute little animals, cases for electronics, desk stuff, guns lol... Honestly I've even replaced light switch covers with a printed version so I didn't have to go buy a faceplate...

SIM-5420967 - March 16, 2024, 3:22 pm

3D Printers can be funny and useful sometimes

Euaggelistes - March 16, 2024, 4:39 pm

Deany - March 16, 2024, 4:52 pm

Can you 3d print me an anime gf ?

TooBurnt - March 16, 2024, 5:34 pm

What do your print? Got any advice? I am currently buying a new computer system and looking to buy a couple 3d printers.

Do you know of any that handles metal? I am trying to prototype computer cases and pcbs.

also you said you 3d printed a gun? Does the guns work? I was thinking on trying to see how people make ghost guns.

No, just interest on how it's done. It's too risky because when you build it you need to test it.

If the calculations are off by a little it can instead of being a gun will end up exploding.

Nah bro you read that wrong. No one should be printing guns ;p

Pikachu - March 17, 2024, 12:18 pm

I have an elegoo neptune 3 pro and I love it. Sometimes it does get hard to find the time to work on projects with work and all.
