Thread: [ALIEN MINER | SILENT HIDDEN CRYPTO MINER | RVN NEXA CLORE XMR](#)

Brutal - March 17, 2024, 8:38 am

No need to pay hundreds or gather thousands of clients to profit from mining!

Pros of Alien Miner:

Completely hidden (Task Manager, Startup, Folders, etc.)

Automatically pauses mining when Task Manager is opened

Ensures stable mining for higher income

Persistence (Difficult to uninstall and keeps workers online longer)

Lightweight GUI (Can handle thousands of workers simultaneously)

Settings can be changed without rebuilding the miner

Alien Miner is not an exit scam project; it will be continuously developed for the long term

Alien Miner does not include any dualhook/backdoor system (all workers will belong solely to you)

Even if the License system is down, your clients will continue mining (unless you close the server)

Since you pay for the product, there are no mining taxes deducted!

Cons of Alien Miner: The GUI is not the best-looking (I prioritized performance over design)

Alien Miner GUI:

What will my earnings be?

It's hard to estimate how much you earn since profits are affected by many factors. The number of workers is not directly correlated with profits, as the quality of workers' GPUs also plays a role. Additionally, bot workers are not online 24/7, and their online time can vary depending on the day.

Anyway, here are some calculations of your profits!

- Coin Name: Raven Coin (RVN)

Price: ? <https://coinmarketcap.com/currencies/ravencoin/>

Exchanges: ? <https://swap.space.co/exchange/rvn> ; ? <https://simpleswap.io/>

Mining Pools: ? <https://2miners.com/rvn-mining-pool> ; ? <https://pool.kryptex.com/en/rvn>

Worker GPUS: 25X 1660 Ti / 25X 2060 / 25X 3070 / 25X 3090 / 25X 4060 Ti / 25X 4070 Ti / 25X 4090;

GPU Workers Online: 175

GPU Workers Total: 600

Estimated Profit Per Day: \$100.00

Estimated Profit Per Month: \$3,000.00

Here is an honest review of Alien Miner:

GUI: The GUI is not aesthetic, but I also prefer more performance than looks. It's very clear and easy to use. (8/10)

Mining: The miner is completely hidden as promised, and I got good results from mining. Sadly, it didn't bypass antivirus on its own. (8.5/10)

Pricing: The price is very good and suits smaller budgets too. Definitely worth buying for profit or more advanced use! (11/10)
