Thread: [Selling AWS SES Account with \\$1000 credits and 50,000 per day sending limit](#)

revolver007 - March 18, 2024, 12:48 am

Amazon AWS SES (Simple Email Service) Daily 50,000 Sending Limit Account + \$1000 credits

What is Amazon SES useful for?

For those who do email marketing, you can send emails to all the email addresses in the recipient list. The e-mail you send is sent directly to the recipient's inbox. This way, you will make sure that you have sent a successful email. Accounts have a limit of sending 50,000 emails per day. The sending limit will increase automatically every day.

Account Quality

The account is created by me, I used a high quality credit card and a real phone number for the account, I applied AWS startup and it good approved and granted \$1000 in credits, the account is a week old, still fresh and nothing has been running on it. The location that is has been approved on SES is VIRGINIA-USA
