Thread: [Microsoft @Live.com email spoofer](#)

TopHacka - March 18, 2024, 2:51 pm

I'm looking for a service to where the program can make a new email address with the domain address @Live.com. Microsoft stoped using @Live.com years ago and switched to @Outlook.com, I need a program that can make deleted @Live.com email usernames so I can click forgot password on my Xbox account

but your name is tophacka

lol

not possible

My name is a meme, not serious. Someone on here wrote that SMTP protocol can be used
