Thread: [SMS/WhatsApp API | Spam-Friendly](#)

RexBlasen - March 20, 2024, 9:30 am

Looking for a reputable service that will allow sending of SMS / WhatsApp messages (either or both, I still want to know) via an API call.

I've seen a few regular providers but will eventually need something that isn't gonna ban me for sending spam (nothing illegal).

If you can provide this please let me know or if you can point me to someone who can I will be very grateful. Thanks.

what are your target countries?

bricknellkathleen - March 23, 2024, 12:32 pm

How does spoofclub work

I do provide HTTP Rest API so One can use it for SMS sending + SMPP connection and If you need Whats-app sender than , I can setup the web portal on custom domain as well.

For detailed information let me know @cxicaller on TG / PM Here on HF.
