Is anyone else aware of this story? Very interesting. And the fact that US government says they have right to 9.9 million BTC (almost 50%) from silkroad which could be with any of us as well seems ridiculous and what happened here is interesting.

Trust me, they think they have a right to all bitcoins, because if someone has 0.0001 BTC they claim they have a right to they'll say your a criminal for not sending it over and take the other XXX Bitcoin you have lol

Moral of the story here. Use a VPN. Also, the government sucks. They said that Jimmy paid all of his taxes, so how is it considered money laundering?

You need to research and plan what to do at least couple years in that kind of extreme scenarios.
