Thread: [High-Thread Bulk SMTP Tester with Auto-Sorting Feature](#)

lucienhf - March 22, 2024, 2:40 am

I wanted to share with you all about my latest project - a bulk SMTP tester that utilizes high threads for efficient testing of SMTPs. This tool not only tests SMTPs at a rapid pace but also automatically sorts out valid ones, saving you time and effort.

I believe this tool will be a game-changer for those who deal with SMTP testing on a regular basis, and I'm excited to introduce it to the community on HF. If you're interested in learning more or trying it out, feel free to reach out to me.

[VirusTotal Scan](#)

Domestos - March 22, 2024, 2:48 am

Heya mate, this isn't really the place to post something like this, this is the lounge, however I do recommend posting a virustotal link just in case

Like this one

<https://www.virustotal.com/gui/file/fe548852e29e6d03b83d718f6bd33d45b2ccb3481135b334a2141e0289698021?nocache=1>

Shows 1 detection.

lucienhf - March 22, 2024, 2:51 am

it's a clean file mate. I decided to share. Virustotal shows 1 because it is an executable, however it is a clean file

I understand, but as always safety first. Virustotal does not show detections because of executables lol might because the nodejs

However I would proceed with caution and maybe ask a mod like [Nostre](#) to make sure this is in the right section.

Thanks anyway mate.
