Thread: [Say good bye to the red screen of death!](#)

dirtyfinger - March 23, 2024, 5:58 pm

Have you ever launched a website and google flags it immediately as malicious or deceptive? Well you're not alone. So many people have issues with google crawling and flagging their site. its one of the biggest hurdles when people start spamming / phishing. So I'm gonna post this ebook that really helped me avoid all those issues, you don't even have to know about "anti-bots". So if you just started or you've had a scampage for a while but constantly have to switch domains cuz you keep getting flagged check out this PDF. i think everybody can take at least one valuable thing away from it.

thats fine, if theres a better way to share it let me know. im down to switch things up

TooBurnt - March 24, 2024, 7:40 am

ROFL this really happening? I hope to god no one clicks this...

Mooooookie - March 24, 2024, 2:07 pm

Yeah, probably not going to be clicking that. Everything about this screams sketchy.

fukkkjahh - March 24, 2024, 10:12 pm

whats the red screen of death

dirtyfinger - March 26, 2024, 6:22 pm
