Thread: [EARN PASSIVELY WITH UNUSED INTERNET | NEW REFERRAL BONUS BETWEEN \\$10-20](#)

Want to make a little extra money without any extra effort? Try GetGrass! It's a new platform that lets you share your unused internet bandwidth in exchange for rewards. You literally just install their browser extension and let it run in the background.

What does Grass do?

It allows verified companies to use your idle bandwidth without accessing your personal information. All buyers are vetted and monitored, ensuring no misuse or illegal activity. Grass only uses up to 0.3% of your bandwidth at any time and will not affect your internet speed as it functions only when you're not using your full bandwidth.

I'm using GetGrass already and I think it's a great way to earn some passive income. Plus, they're currently in a beta phase, so there's potential for even better rewards in the future.

Sign up with my referral link and we can both earn bonus rewards
New referrals will receive a 5,000-point bonus upon reaching 100 hours of uptime!

5000 points can be pre-sold for \$10-20 on [Whales Market](#).

SIGN UP WITH MY LINK TO GET THE BONUS ->

Here's what you get with GetGrass:

Passive income - Earn rewards for your unused bandwidth

Easy to use - Just install the extension and forget about it

Be a part of the future - Support the development of a new and innovative platform

Safe and Secure - GetGrass emphasizes user safety on their website. They claim transparency about what data is collected and used only for technical purposes to ensure smooth operation of the service.

What are you waiting for? Sign up today and start earning!

Nice one, how do they pay/reward as I see on the website it says it gets credited to the account? Any ways to cashout or anything?

Edit

Did some more digging myself and I see that it's in a beta phase, and points can be redeemed into Gift Cards and etc once it's in it's full release - Will be looking forward once it's out :D

Where did you read the stuff about the gift cards? As far as I know Grass points will be used for the Grass token airdrop. And that's also the reason points are tradable on WhalesMarket and etc.

Late Reply, my bad.

Just some Google Searches and on the website/white paper to be honest. Probably just a marketing strat, airdrop makes more sense if it's gonna become a coin

As Grass is getting closer to launch, now we have the option to connect our Solana wallets to receive the airdrop once it happens.

One of the most traded, if not the most traded points on Whales Market with over \$2 million in volume. Are you guys excited?

Later on you'll also be able to swap the points for gift cards / crypto and etc.
