Thread: [General question about cell phone hacking](#)

Commission8922 - March 24, 2024, 2:20 pm

Hi,

I'm reaching out in this forum for any helpful information. I'm not sure if this is the correct place to ask but I thought I'd post and see.

Is anyone familiar with mobile phone hacking? My mobile phone is getting hacked and has for some time. It doesn't matter if I change the number or change the phone. I've done this many times and shortly after any change it's hacked again.

There's a lot more info regarding all this. But I wanted to ask if anyone can advise what I can do to prevent this and possibly find who is doing it? Or suggest someone who can help.

Thank you

What you've done and generally every scammer or person claiming to be hacked does, is not provide any details on this supposed hack. I'm writing this off as a case of cyber hypochondria. I'd put money on you jumping at shadows. You're fine. Or you need to buy better phones.

Classic case of psychological issues that requires professional help. Suggest you seek a doctor OP.
