Thread: [Looking for an partner/investor to invest \\$100 in BNB for a return of \\$12 BNB per day](#)

PurpleGalaxy - March 24, 2024, 7:28 pm

EDIT:

After chatting with some member he advised me that simulation is not good enough to predict the outcome and to wait and test it with real money first, so I will wait until the end of the month, than I will use my own \$100, and if it goes up from there as expected than I will sell the method on the marketplace and provide 5 vouch copies so stay tuned.

So no need to DM me, thank you.

Old post before edit:

I have found a new method that I have simulated over and over again, the thing is I will get my paycheck at the 1st of next month than I can start doing the real thing, I am already broke and would like to start making money right now, but with no capital all I can do is wait.

If you are interested I can share the method with you and the concept of it on a call and I can share my desktop, if you are seeing this post after the 1st of the month than no need to contact me as I would use my own money by than.

After testing it averages an earning of \$25 bucks every 24 hours, which means we can split \$12/\$12 each, as for me I will keep my share always on the capital to enforce safety.

Before you ask what is it, just dm me your discord, if I don't answer it means someone already made a deal with me.

And before you call this a scam or something I am ready to install it on a VPS you provide so we can both monitor it, and you do the payouts, so you can be the one paying me my \$12 per day and you can watch your own money, but I have 2 conditions, never share the method with anyone, and don't scam me, well you can scam but I will make sure everyone knows about it in here, therefore I will only accept a deal with a high reputable account.

Only one person is needed, \$100 is needed to start but remember if we do 1000 we can be making 250 per day average, I ran my stuff for 2 weeks with 0 failure, and its still running in simulation mode.

Regards

25% of your investment, returned every day? That sounds nice. I have an idea of what this is about, but my knowledge isn't great in this field. Still learning. Also, is this only available through the international Binance site?

I unfortunately don't get paid again until the 29th, so I can't help until then.

Well thanks for your trust, and karma will pay you back, I will share the method for you for free you can use it again if you promise not to share, I have a family to feed and planning to sell it for a large sum because its powerful, I will give you a demonstration for free on discord and will send you the REPO because its not my code its just my configuration that does the trick.

than you can clone it somewhere and run it, send me your discord I can have a quick call if u calling in the next 10 minutes and will show you live.

Just a quick update, I started with 5 USD in BNB yesterday, today its 22 USD in BNB.

this is with real money not simulation, so I will keep this going for a few days to see if its gonna keep going or lose.

I don't need an investor anymore, I was just paranoid thinking it will need more money to stay safe, but I have improved it to be extremely safe and slow but still yielded same if not better outcome.

After I collect some real world results, recorded on the blockchain I will start selling the method, however I am not sure for how much, probably between 25-100 USD, but I am not gonna sell it if it fails, I do not trust it yet.

But after some time if this yield the first 100 from my initial 5, that means it can scale up huge, in which case I might just scale it up and never sell it.

From an ethical stand point, I don't want to be encouraging anyone to do betting even if its a working method, and even that is not related to a casino.

So maybe this post will be just to share an experience.

Regads

ok its still doing good at 26 usd now, but I am stopping the bot and moving on with my life, I decided to not pursue gambling, it was a fun experience, not even going to sell the method, and believe me this is for your own good, who knows maybe I am having beginner luck?

maybe you can never be too smart, otherwise people would have been doing it before me.

I will take the 26 and stop, also from a religious stand point, I don't want to be spreading gambling, I will close this thread.
