Thread: [10 MINUTES OF PURE RAGE - "MW3 DEATH COMMS"](#)

oRequiem - March 24, 2024, 9:35 pm

I finally got enough Rage Reaction Clips to make a new Video about people getting angry at me.

Let me know what you think. Enjoy :)

Kalvaxas - March 24, 2024, 10:44 pm

I don't ever play CoD anymore, but I used to play religiously. The raging (my raging) is the reason I stopped playing for the most part. I'm getting nostalgia from watching this though. If I ever play again, I need you on my team LOL

Does that play well? Saw a little gameplay and it didn't seem too bad. I'm not a mobile games person though. Also do you use a controller or anything like that? I know a lot of people do even though it seems super cheesy to do so haha.

Not sure if the issue was fixed, but there's an issue where it's frying people's phones. It almost nuked mine.

COD mobile warzone is good though it has a good room for improvement but graphics are great as compared to other games. They dont have voice chat active as of now which pisses me off as you cant co-ordinate with your team mates.
Worth a play though.

Typical COD lobbies tho would be everyone screaming at one another ?

Wtf? Nah that's surely gotta be fixed by now and or be with like a specific phone or type. That's fucking wild LOL. Sadly it's not the first time we've heard about a game on mobile or even PC frying part of your system. Likely wont be the last time either.

Maybe I'm missing something or misunderstanding something, but I did a quick search and it seems that it is in fact in the game and able to be used as well. Though it also seems like it isn't the most straightforward to get working haha.

That's what it seems like based on what I came across. Again, maybe I'm missing or misunderstanding something though. You'll have to investigate haha.

These are the best to watch and listen to. Especially the ones who just yell in their mic instead of calling out. It's the best
