Thread: [TikTok - 0 Views for few days?](#)

Always Sad - March 26, 2024, 9:41 am

Is there a way to reset this?

I started uploading 6-7 videos and a few of them got a couple hundred views. I decided to post a few more but they are all at 0 views while others are at 300-400.

Is there a way to reset this bug?

Are you following the same structure as your other content?

I've made a new account yesterday and started posting on my "niche". Its my first time posting as well. I guess they possibly flagged my IP for spam ?

If it's absolutely zero views then you're most likely shadow banned

Yeah after doing some research I think I am shadow banned.....

Trying to get it unshadowbanned.

Trying to get it unshadowbanned. Depending on the age of the account, you're better off just ditching that account, and starting over with a new account, rather than trying to get that one out of shadowban.
