Thread: [How can I find vulnerabilities in websites?](#)

dtb1031231 - March 27, 2024, 8:03 am

Hello everyone, I don't have much experience in this field but I have a strong interest in learning about it.

Can anyone tell me how most vulnerabilities in websites are found?

BiNBo - March 27, 2024, 8:53 am

Look into the OWASP Top 10. <https://owasp.org/www-project-top-ten/>

Quote:"The OWASP Top 10 is a standard awareness document for developers and web application security. It represents a broad consensus about the most critical security risks to web applications."
~OWASP

I also recommend for learning this stuff "tryhackme".

msrobar - April 8, 2024, 3:13 am

search some information about owasp

DynamicW - April 13, 2024, 2:45 pm

Portswigger and THM have some pretty good learning resources for beginners who want to learn website hacking and stuff like that.

Code-X - April 14, 2024, 1:36 am

even, you can learn more on ([hackthebox](#))

joeflower - April 14, 2024, 8:08 am

yes for beginners its really good side. <https://www.hackthebox.com/>

SilentNuke - April 15, 2024, 3:44 am

TryHackMe is a very good resource for learning web vulnerabilities.

Radimir007 - April 18, 2024, 11:46 am

Try to use some linux tools like nmap, gobuster...
