I strongly believe this is possible and a fact in the near future.

It might be the weed talking to me,
maybe the deja vu's iv been having,
something will happen and market will skyrocket
it might be in the next 6months to 2026 at max

more printing will be become so crazy u don't even know how much more they can and will print all over the world
this is just the beggining of crypto still its only 15years old at 18 u get ur party so will this or maybe sweet 16 u never know

p.s - this is a flashback moment
