Thread: [No access to post in marketplace?](#)

vRWN - March 28, 2024, 1:59 pm

Hello everyone,

I am trying to create a thread in the Premium Sellers Section but for some reason I am not allowed to.

As far as I know I don't have any warnings and I am also l33t, don't know why it is not working for me...

Hope someone can tell me what is going wrong, thanks!

That changed, premium requires vendor now.

Ah thats why, couldn't find it anywhere. Thanks, I guess it's time to upgrade again

Neither right now but isn't the username color worth it? :)
There are other perks too & it will make selling, API, autobuy/contract templates easier for you if you do.
- I actually had someone else buy it for me, so...

What about the request section? If a premium member can't request either.
