Just a heads up for other gfx artists attempting to deal with him, guy doesn't know what he wants. Makes you create a price based off of a relatively simple example. You spend a lot of time on his work while he constantly keeps changing his mind during the design process without every paying anything. Pricing was based off of a childrens drawing but he expects a Mona Lisa in the end, when you want to adjust your pricing he says he's broke and disappears. Doesn't wanna go first because of his HF ratings either.
