Thread: [\[Fallen\] How to Bypass Fingerprint Sensors](#)

DramaKing - April 6, 2024, 4:25 pm

It's not the newest technique, but I dug up this method that is able to fairly reliably fool fingerprint sensors with pretty simple steps to lift fingerprints and create impressions in wood glue. The only downsides are that a fingerprint needs to be enrolled, so no newer iPhones, and you need to be able to get a clear photo of the correct print.

Super interesting stuff, thanks for sharing

Eran - April 7, 2024, 3:44 am

Thanks for the share. :)

Khaledpp - April 9, 2024, 4:17 pm

thank you :)..for all this.??

HofmanolD11 - May 21, 2024, 4:22 am

Thank you, tutorial is so good, bro!

mikeyp - November 26, 2024, 11:03 pm

Very interesting, thanks for the information.

Were you able to test this out yourself? Interesting concept. Curious on whether it really works. Thanks for the share.
