Helldivers II

A friend of mine kept nagging me about trying it.
Luckily, someone owed me money and couldn't pay directly in Crypto so I asked if he can get me steam funds instead.

I bought the game, hopped on and gave it a spin and it's hella fun.
I have always thought "It's impossible to create a decent Live-Service Game" but looks like I was wrong.
The more your progress the more you can increase the challenge, there are a lot of updates going on from what I saw.

I have played solo and in squad with friends, It's crazy entertaining.

Definitely a recommendation from me

Glad to hear you're enjoying the game! It's been awesome seeing the success and positive feedback the game has been getting and all the devs did with it as well as continue to do. I don't personally have it and honestly probably won't get it, but it does look like a lot of fun and especially

with friends.
