TooBurnt - April 8, 2024, 11:33 am

Watching live streams for now. It's cloudy af where I'm at but hopefully we get a break and I'll be able to see it.

Yin Yang - April 8, 2024, 11:33 am

The peak time is 3:30 in nyc. What do the flat-earthers have to say about it?

Jamika - April 8, 2024, 12:08 pm

Not on my country but saw it on tv, marvelous to say

Undead - April 8, 2024, 12:16 pm

Looking forward to the +10 :p

Eran - April 8, 2024, 12:29 pm

Was at work but even if I wasn't, not visible in my area

OpSecSurvival - April 8, 2024, 12:33 pm

Here's my Video of the Eclipse!! If you pause it just the right moment towards the middle of the video you can perfectly see the crescent shape as I'm fumbling with the filter

Yo, let me know if the video below actually plays for you or if it gives you an error

Here's the raw link in case the big fat perfectly placed video doesn't work below. I don't know why it's not working for me, but it isn't so here.

I'm off work in 27 minutes when I get home I'll Rep everyone.

Hope we can all Rep eachother BC if you think about it, all of us were looking at the same exact thing at the same exact time from different places all around possibly the world. I'm not sure how

eclipses really work, but if I smoke enough of this white widow, I'm sure I'll figure it out.

Cheers boys! ?

Yin Yang - April 8, 2024, 12:51 pm

Cloudy day but I got a few pictures. Totality was pretty awesome, I've seen two eclipses before but they weren't total eclipses.

Partial eclipse, great pic

Total eclipse, trash pic because clouds started getting thick again

? Yeah they were super excited in the lead up to it. My daughter's read about them and has a scout book that has some eclipse viewer we built just prior to it. Then it happened.... she's kicking grass in the yard and just, "Can I go play now." ?
