This is incredible. [I've been following \\$BRETT since it was about \\$200m MC](#). Here we are, almost 1 month later since my post, if i bought back then and just patiently held this trashcoin... today i'd have about \$8000 USDT.

Damn...

Every year theres at least 1 memecoin that goes viral and makes a bunch of people millionaires. This could be the one.

The first memecoin on Coinbase \$BASE chain

Has anyone in here bought it yet?

Today it made an ATH and Market cap soon to hit \$1B

I'm deep in APU and MAGA. Traditional altseason is dead, but memecoin season is in full swing

How do you even find these coins?

Are these your random bets or there's a reason?
