What are some cool things to buy on Amazon? Anything you guys know of that can like... change my life? Or just make me happy? Create a vibe everytime I look at it/hold it/use it?

What?

Amazon Kindle is a good purchase if you're into reading.

I was actually thinking that... do you mean the erm... black and white ones? Or the Fire HD tings?

a 1" foam mattress topper can change your life. Also if you drink coffee I suggest getting a French Press.

Why a French Press? The mattress toppers really that good?

For me a french press offers the best flavor and is super simple. Just boil water and pour it in the press with some coffee grounds. Easy to clean and super simple, get an electric induction kettle to make the process even easier + faster.

Mattress toppers are amazing, I wont ever go back to just sleeping on a bare mattress.
