Why is it detecting WD tablets?

VBS, JS, EXE As soon as they are compressed, the download is detected

Could someone very kind help me understand why and what to do?

I will be grateful
greetings to all

You don't explain what "WD tablets" are or what is detecting them, but your files are being detected because they contain malware. I don't know what else to tell you.

hermano perdona es el traductor
hablo español

me refiero que encrypto en js, vbs, exe y esta fud pero al comprimirlo en winrar detecta la descarga de cualquier navegador
e incluso e probado haciendo ejercicio sin malware en el codigo vbs lo subo tambien detecta con solo guardarlo como vbs [warn]

Maybe if I knew what kind of detection. WinRAR is commonly used for malware.
