Below is my full review :

The setup and delivery was fast, about 30 minutes. He helped me understand everything on anydesk.

The spreading method is indeed automated but you need to invest (about \$50) to do the setup. OP have lots of ideas to make you money from botnets.

I was in hurry, so I bought bot loads from another seller and it had few Metamask logs in it.

Raven helped me recover crypto from the wallet, \$339. Boom!

The telegram group is new and fresh.

Overall, it was wonderful experience working with seller. I recommend the service to anyone looking to start their own Malware network to make money from it.
