Thread: [Typing Speed](#)

Scar . - April 12, 2024, 4:36 pm

Hey y'all,

Recently bought a new Asus ROG Azoth keyboard and it sounds super nice and I have been obsessed with typing as of late, which got me thinking.....

How fast are you guys at typing? I know for a fact there's on here that are absolute beasts at it. I usually hover around 80-90wpms with tons of mistakes in between. I've never really learned the whole asdf jkl; technique, I kind of just 'free-style' it.

Here's my most current test lol

Last time I tried this I was around 79... it's been a little bit. That's a decent speed tho!

Tried it before on lab and i was shit on typing, seems one of most losers rank

Momentem - April 12, 2024, 5:22 pm

I was around 80-100 wpm with my last recent dispatching job. Data entry is only so fun you know?

Toscan - April 12, 2024, 7:24 pm

1st Place!

73 wpm

Lol I'm getting old. It also depends on what the prompt gives you too I think :P I had lots of errors.

Mooooookie - April 12, 2024, 8:48 pm

I dont know my current WPM, but I've always been a pretty fast typer. Growing up everyday on the computer will make you a good typer whether you want to be or not. :)

Deany - April 13, 2024, 6:10 am

Not fast at all, I am using a laptop lolz

Undead - April 13, 2024, 7:33 am

I've always been shit at typing fast among other things.
