Thread: [What's your typing speed? o.0](#)

**SpiritualDose** - April 13, 2024, 7:37 am

I have used this website for years to constantly keep my typing at par.

Here's the site that I use: <https://typing-speed-test.aoeu.eu/>

what are your results?

That's a good score man, I only achieved 48 WPM. My laptop keyboard is not great to type on.

I've been in school for IT since I was young (I didn't finish lol) but my background in technology has definitely carried through.

I work on a constant basis with emails and typing letters for residents of our sober homes, so I'm always typing and my co workers are always amazed by my typing lol

Yeah, I can see that you're proficient at typing. Do you look at they keyboard while you type? I do, which is one of the reasons why I can't type faster.
