Will you be offering vouch copies to reputable members? This is quite a steep price point but wish you the best of luck! I think getting some vouches first will do you well

I received a vouch copy to test Scantime and Runtime results and my experience.

Software Used : Rem 4.9.4

Encryption Options : Hidden Startup + Process Injection + Pump

Scantime Results : <https://avcheck.net/id/wVXPPQxyolst>

Runtime Results : <https://scanner.to/result/qYuqgtxmE42Y>

Price : 8.5/10 Runtimes are pretty good for a monthly 130\$ Service

Undetectability : 8/10 Not just assured W10/W11 but also bypassed many others

Customer Service : Seller is very responsive and seems to know what he is doing, definitively does not look like a reseller product.

Conclusion : I can vouch for this subscription based crypter if you need .exe outputs it seems like a good option to run remote controllers such as Rem or in case you need to crypt many different types of files at once you can certainly get a good deal out of using this service. Seller claims product is updated/cleaned regularly you could enjoy some good results until your subscription expires.

Vouch +

I recently purchased this crypter and my experience has been great amazing support and real fud results I couldn't ask for anything more easy

UI and user friendly I would recommend this to anyone who in the market for a FUD CRYPTER!

I contacted the seller and he only showed me his various channels. The tests he mentioned here are completely nonsense. He refused any tests and could not provide me with a copy of the credentials. It's ridiculous

So far, I have helped dozens of people and given a test file and I have a telegram group where people are actively chatting, you can ask anyone there, I made a contract and they approved me from there, I have a telegram group where 130 people are active and you can ask as many questions as you want and get information about me. The test file is for some reasons. Sometimes I don't because some coders are trying to harm me.

Styx = Scammer

A turkish !scammer!, i have paid him 500\$ to provide EV certificate after he was over and over messaging me and telling me he got it.

After i have paid him he confirmed that he got the funds then for few days he didnt answer finally he blocked me and deleted all messages.

ScreenShot proof : prnt.sc/iKTEWf15fR3t

In total i have paid him above 1,1k+ for some PDF method + Crypter, all his service's are a scam.
