Thread: [Spoofers WEB Panel for sale ## AUTOMATED ## DESIGNED ## DTMF ## OPEN YOUR SPOOFER!](#)

opsec667 - April 14, 2024, 8:42 am

Hello to the whole community,

As a developer and with the permission of my client, I'm offering a Spoofers WEB Panel for sale today. This Panel was version 2.0 of a service called "SpoofHUB" and now that I've developed their new version they've agreed to let me sell the old version. I know that this has interested a lot of people who have made offers to buy the old source so I've decided today to put it up for free sale so that anyone can use it and open their own Spoofers.

This WEB Panel has been entirely designed by myself from scratch, in HTML/CSS & PHP (PDO/POO). The panel is currently designed and compatible with MagnusBilling (an asterisk-based billing system), enabling the panel to function properly, i.e. to be automated.

The panel is complete and just needs to be put online. It features the following functions:

- Encrypted login & registration.
- Dashboard displaying stats, current subscription and latest news.
- A Guide & Tutorials page in the form of a forum to help customers use your service.
- A Support ticket page to provide additional help for each customer.
- A SIP Access page, displaying the user's SIP access, allowing him to change his password and Caller ID, and two videos showing SIP configuration through a SoftPhone.
- A Call History page, which displays the customer's outgoing calls.
- A Calls in progress page, which displays calls currently in progress on the customer's SIP.
- A Reload Minutes page, which allows you to purchase call minutes based on pricing pre-configured by the admins.
- A DTMF Interceptor page, to intercept the victim's DTMF PAD during a call.
- An SMS Spoofers page, to send SMS with a modified SenderID (requires SMS API).
- An HLR Lookup page to check whether your victim's phone is online or not (requires HLR API).
- A Subscriptions page, enabling your customers to subscribe to your services.
- A Fund Deposits page, which lets your users deposit cryptocurrency into their account (fully automated)

Screenshots of panel :

<https://ibb.co/BzFzjHt>

<https://ibb.co/5RpBR3V>

<https://ibb.co/Zd7S4f2>

<https://ibb.co/9wN2zyJ>

The panel has been pen-tested and is secure.

It also features an administration interface that lets you manage users (modify their balance, view history, and other information). It also lets you manage history (calls, dtmf, deposits) and support

tickets.

The selling price of this entire panel is : 3500\$

Installation & configuration of the panel on your WEB server is : 500\$

Custom MagnusBilling installation: \$400

WEB PANEL + Magnus Installation + Installation + Panel Configuration is : 4000\$

We also got SIP Provider with good prices if you need.

Support is free and guaranteed.

Middleman is accepted and recommended.

Thanks you. Available to sale.

6 - April 19, 2024, 5:39 am

Your whole operation relies on the sip route reliability, yet you do not mention how long have you lasted and how long would it last and how much will it cost?

SIP lasts 1 to 3 months on average, depending on the volume of calls, so if there are a lot of people, it's bound to jump faster. But opening a route is as easy as pie, and makes perfect sense.

opsec667 - May 7, 2024, 8:42 pm

I am currently available for sale, DM me.

marsexg - August 22, 2025, 2:00 am

Good work , buy for 6 mounts

Plan 3

Good man

guzman1337

@SCARETH1337

a complete swindler.

Scammer refusing to request a middleman deal!

Scammer asking for a small amount with the conditions for testing!

Scammer asking for \$150 for consultation & 1 hour system test!

Scammer who goes into hiding immediately after getting deposited money for the purpose of

testing!

Never make a deal.

There is no solution advertising that this poor scammer is offering.

Only, it's a false advertisement to steal a small amount of money.

If you ask for the evidence of the scam, I will send it all.

I have all the data for scams.

I will send the data to the person who requests it.
