Thread: [Database of leaked usernames/passwords](#)

menorewiskor - April 14, 2024, 8:55 am

Hey guys,

I'm looking for a database or a list of leaked authentic users/passes that people used on e.g. some website and they leaked.

Something like haveibeenpwnd but user/pass (not e-mail/pass) and of course with passwords linked to the usernames. I'm sure there's something like this, could you help me out?

Be careful, from the [Help Docs](#) :

4. No posting of personal information that isn't yours. Privacy is to be respected here. This includes any passwords, logins or dumps.

7. Advertising of competing sites is not allowed. This refers to any website with a hacker forum that's similar to HF or has a relatively similar forum structure. Advertising includes signatures, PMs, profiles, and posts.

Oh, I didn't know that. Sorry!

There are certain competitors that actively support this and other types of cybercrime.

I will add that if you're trying to use public breaches to take over online accounts, you have to be fast.
