stroke glow shadow effect MONTSSERAT bold on CANVA?

hy everybody,

i try to get the same as in the picture bellow with canva but impossible because of the low intensity and we can't combine many effects in canva we can just apply one effect, so choose an effect, i want to get the same result as the image below but in canva

in capcut for example we need to make a shadow effect (100%), a stroke effect (30%) and a glow (100%) on the font bolt montsserat (see image) in canva , it's impossible because we can't combine the effects and the intensity is poor and we can't find the 3 effects... we can't find this effect (the shadow line shines in canva and we can't apply the theme at the same time) and I really need to do it in canva...

do you have solution to get exact same font with effect in canva ?

Thanks in advance

You can try to achieve a similar effect in Canva by manually adding a stroke, glow, and shadow to the text. Here are the steps you can follow:

- Add your text in Montsserat bold font on Canva.

- Duplicate the text layer to create a shadow effect. Place the duplicate text layer below the original text layer and offset it slightly to create a shadow effect.

- Increase the transparency of the shadow text layer to make it look like a glow effect.

- Add an outline/stroke effect to the original text layer to create the stroke effect. You can adjust the size and color of the stroke to your liking.

- Play around with the opacity and blending modes of the text layers to achieve the desired effect.

It may take some trial and error to get the exact same look as the image you provided, but with some creativity and experimentation, you should be able to achieve a similar result within the limitations of Canva.

it's really really difficult i can't have what i want !!

can you send tutorial if you get approximative result ?
