Thread: [paypal 2fa bypass](#)

pingudoesc - April 16, 2024, 12:35 pm

is there anyway to bypass paypal sending a 2fa code to the accounts' phone number

Tuffty - April 16, 2024, 12:40 pm

Pfft be nice if there was

Only in your dreams

4chan.org/b/ - April 17, 2024, 10:19 am

Unless its a browser that its been logged into before, nope.

easy

(Apr 17, 2024 12:56 PM)DramaKing Wrote: [\[CITE\]](#) Hopefully you know what simjacking is. All it will cost you is your soul.
easy you need burp to intercept requests and modify them False/true

DramaKing - May 25, 2024, 12:13 pm

more information in private

(May 27, 2024 08:16 AM)Tobin_frust Wrote: [\[CITE\]](#) more information in private
the request you modify to false true and your cc is added to your paypal account

Emdl - August 11, 2024, 5:30 pm

Interesting topic!!!!!!

burp won't work, its a server side function that sends the OTP code lol.

(Apr 17, 2024 12:56 PM)DramaKing Wrote: [\[CITE\]](#) Hopefully you know what simjacking is. All it will
cost you is your soul.

Well, there are some sim providers that you can just call and say "Hello, i'm MR.X. My sim was
stolen along with the phone." Heard stories like this lmao.

change the OTP to false when the request is sent, will work better. ㄟ_(_)_ㄟ
