Thread: [Will using the BYOB botnet interfere with my ISP](#)

zestyhitler - April 17, 2024, 1:19 pm

Hey guys i just wanna say if i hosted a Botnet in byob . Will it be hosted on my home network or somewhere else?

AnonAlias - April 17, 2024, 1:44 pm

the botnet is hosted where all the bots are lol the controller might be hosted on your network

What risks does that put on me

AnonAlias - April 17, 2024, 2:34 pm

I dont have nearly enough information to give you a risk analysis. you need impact and probability to determine that. just saying byob does not give me any information as to what the botnet is. are you purely building your own? you already have zombies? do you have the CnC set up?

running a CnC without any obfuscation and on your home network is going to put you at risk. however, because of the nature of a botnet, you would probably be ok. if ur afraid of the risks then dont do it lol
