Thread: [Steam with CS2, inventory - \\$5000 OG Skins, community ban, personal account](#)

AfunnyBunny - April 17, 2024, 6:37 pm

Hey Homies,

Selling my old Steam account with some juicy loot, this is community-banned and will be unbanned in January 19, 2038 (Yes around 10 years). Can still play games, cs prem, and play with mates.

The price is bound to go up, already profiting hugely since [2018 pricing](#).

CS2 Inv Value - \$4108.03

Dota Inv Value - \$546.75

With keys now being seen as a rare collectable, and some ultra-rare stickers this is going to yield nicely once unbanned.

If I didn't need the money I would hold this as a long-term investment.

Message for more details, no lowballers, genuine interest only ?

really cool inv but the price is probably going go down in the short term because of their hacking issue. people are boycotting until they fix their game.

Whats the price on this bad boy? Is this actually your account or one from the stealer you say you have?

StickyJet - April 17, 2024, 9:32 pm

Yes idont need this now but thank you

Is this first time getting community banned? You can send a ticket to steam support and if you get lucky might get it lifted. I could give you some tips if you haven't done this yet
