Euaggelistes - April 22, 2024, 4:53 am

Was taking a look at this...that's a lot of bytes for a resource pack.

Yeah, I figured it would keep leachers away and that older members wouldn't mind paying the
bytes. But since youre a long time member I don't mind just sending it to you if you'd like ?

And then you can just gift me the amount of bytes it's worth to you.

How's that sound friend?

Much appreciated. Totally up to you. I'm much more interested in the code most of the time than the
programs themselves. Might be worth a look.

Pr0m3th3us - April 23, 2024, 2:24 pm

Oof yea maybe lower that a bit, 70? Idk I'm skeptical ?

thread every day to recieve free bits!)

David Cho - April 24, 2024, 8:49 pm

So it's a good pack, valid tools with a valid purpose. But the tools are bound with viruses so please run on a virtual machine.

One of them dates back to a ddns server started in 2014 and are currently up and responding.
So again please use at own risk.

By posting. Or becoming a member. Go to the Social tab and click on the Lounge. You'll find a Daily check in thread. Posting in there once a day will net you some bits :)

Please read the first post

Genokka - October 8, 2024, 8:37 am

The hack pack is pointless to me anyway. So I am no longer concerned about whether or not it works. What I need is a script or an app that will let me successfully change my IP address on my android device
