Thread: [Happy 4/20 - To Both Marijuana Users and Non-Users!](#)

Moookie - April 20, 2024, 3:59 am

Happy 4/20 my people.

I know not everyone here is a marijuana consumer, but that doesn't mean that everyone can't still celebrate the holiday in one way or another. If you do indulge in smoking ganja, share your 4/20 plans for the day! Planning on getting up with some friends for a smoke out? Maybe staying home with your significant other and smoking out the house? Whatever your plans are, would love to hear about them!

And for my non-420 users, feel free to share your plans for today if you're doing anything interesting, or even if its not interesting.. would still love to hear about it.

Me, personally, I'm not planning on going anywhere. I'm going to enjoy my 4/20 right here at my house. I'll spend most of my day in my office like I normally do, only difference is today I'll be ingesting all different types of weed. I have a few different strains, mainly all indicas.. but atleast one hybrid. Both flower and disposable vapes. Will be a laid back, relaxed day. Work will get done as per usual, as the world never sleeps and so neither do I. Smoking trees and working, that's my 4/20 in a nutshell.

I am not a user that will partake in the consumption of the marijuana, but I do have some plans for today. I started painting my rims last night and I'm going to continue doing it throughout the day today :)

Happy 4/20 to you too, friend!

Pr0m3th3us - April 20, 2024, 4:21 pm

There should be a national beer drinking day. I don't do drugs. Just drink beer, every day.

Or has it just been too long, and you're ready to give the lungs a break? I can respect the decision. While I've smoked majority of my life, I have had periods of times when I quit for up to a year, one time almost 2 years.

Smoking without a prescription isn't lawful in AU so I can always get done, my lungs are black, I cough resi's and struggle to lay down. Can't breath without panting after a small jog. I'm smoking \$50-100 daily. I don't even have a job I can't live like this.

?ystem - April 20, 2024, 6:52 pm

No real plans other than indulging once I'm off of work and finally home. Luckily, I don't need to go outside to smoke it but will need to for the eventual cigarette afterwards.

I actually ended up passing out. Lol. Didn't make it 12. I was good while smoking one strain.. once I made the decision to do other strains, ended up falling asleep in my chair. Woke up when my alarm went off to check in to HF sheeeeeesh ;x

Definitely sounds like you should quit. Anytime it gets that bad, unfortunately time to put it down. I made the sound decision recently to switch to dry herb vaping not to long ago. Alot easier on the lungs. I don't cough nearly as much, and I can actually taste the herb better then when smoked.
