you won't even see any profits from the casinos until at least 1-2 months after you send your first batch, and that's if you come out positive. you have to play through the credit's to be able to cash them out. Yeah there's Blackjack that can mostly get you even, but its not guaranteed. also, these casino's ban people daily. VGW which is chumba, luckyland, and global poker - banned one one = ban on all. you can't make new accounts either, unless you have a real human being willing to let you use their infos/banks/etc. Pulse / Pulsebingo takes MONTHS, 2 more likely 3 months to credit. So, a lot of money to be investing when you are likely to get banned for no reason at all (because they can do that since you agree to their TOS) and then boom - all the lopes you have mailed out - gone , all the money you spent on this guys method - wasted.
