Thread: [IMEI Spoof/Change?](#)

Svennen - April 23, 2024, 10:38 pm

Hello!

I managed to get my dumbass hardware banned on snapchat due to drugs (smoking zaza and someone reported my story)

I was able to bypass this by sideloading snapchat trough appdb, but that stopped working. Is there anyway to spoof my IMEI number or change it somehow to buypass the ban?

Thanks!

-Svennen from Sweden

You completely left out what type of device you have (it matters) but nonetheless. You can potentially do it using the right software with some Android devices, but you aren't likely to have much if any luck for iPhones. You're more likely to be scammed out of money you'd pay for software that doesn't actually work in regards to iOS. That being said, depending on the country and your local laws (unsure about Sweden). In most places its actually very illegal to change a phones IMEI. I'd do some more research, but honestly just get a new phone.
