VOUCH COPIES AVAILABLE: 1/1

Freshly Created US .Edu Email Accounts - Perfect for claiming loads of free software, discounts and more! Created from a high profile online university allowing great access to nearly all available us student discounts. Read in-depth list below to see what you can get with this while outside the United States.

The best services you can use these accounts to take advantage of are Spotify Premium (\$10.99 > \$5.99 + Free Hulu Sub) and Amazon Prime / Prime Video. Free 6 Months of Delivery on Amazon pays for itself if you use it often, or if you don't. 1 Order's shipping cost will cost more than this account lol.

The Only Requirement is 2FA, you can use the free Google Authenticator App or Microsoft's Authenticator. If you don't want to download the app on your phone you can use Bluestacks on PC.

More Indepth List - Updated: 04/26/2024 (? = Works Globally, ? = US Only)

Before I continue with this list, I want to make clear I am selling a fresh .Edu email address. I am not guaranteeing access to any of these discounts or freebies. Please Google beforehand to see if a promotion is still active or not, or message me and I'll let you know. Some of these services may require SMS Verification, Card Verification (Doesn't have to be the name on the account) or other forms. If I am aware of it, I will try my best to keep this list updated. If no verification listed it has none.

1 Email is \$3.49

You don't have to buy 10. That's bulk rates for resellers.

**deim0s** - April 29, 2024, 11:09 am

What are the chances that the emails have been used? Or are they all fresh and ready for everything stated?

They didn't exist before I made them, not cracked or stolen. The only person to ever access them is me. They are also made with completely random information. But once you add 2FA and change the password they are fully secured.

I tried to claim the JetBrains licenses with these emails and it didn't work. Sorry.
