Thanks all. Just got this, will be picking a winner today. I am about to have an interview but will choose a random number generator to pick a number 2-(# Of posts), and if the person QL'd the post they will be picked for 1000 bytes. If not I will generate a new number until a qualified post.

Will update here

First random number was a closed member, second random number generated was [Syndicate](#) donated the bytes. Congrats!
