With this method, you can make HQ short videos using AI technique. Upload them on TikTok and Youtube and make \$\$\$\$. It may require some investment but you can do it free, will be require some patiences. Good Luck!

Hackers - December 8, 2025, 6:30 pm

Good guide, I can personally confirm that the concept works very well. I will explore the specific tools from OP, but the method overall will work if people do this. It can take a little effort, but this is the type of thing you could do every day for years tbh. It will work out for anyone with an imagination and some time, and it doesn't take that long.

YouTube officially announced that it will stop monetizing AI-generated videos starting July 15, 2025? Has that not happened?
