Thread: [Best Fastest External Hard Drive for Mac?](#)

Chapman - April 29, 2024, 2:41 am

As title says, kindly recommend me best external hard drives with maximum speed and reliability. Better suggest me from Aliexpress website or amazon. Thanks

I guess get a NVME SSD and an enclosure using USB Type C or USB 3.0 then off you go. There are tons of cheap NVME SSDs to chose from, just make sure that its legitimate and it has good reveiws both on the ecommerce site or on google. Watch also YT videos, about the product you are aiming for.

Okay as you wish.

NVME SSD - 2TB - 115.99 USD

- <https://www.amazon.com/Crucial-PCIe-NAND-NVMe-3500MB/dp/B0B25MJ1YT>

Enclosure - 15.19 USD

- <https://www.amazon.com/ORICO-NVMe-Enclosure-Gbps-Support/dp/B08G14NBCS>

I don't know how much size you need but I am guessing 2TB maybe? So I suggested these links. I hope it all works out for you. Check for reviews and rates so you wouldn't blame me if you attempt to order it and if its not worth it. ?
