Thread: [30 Ways to Get Someones IP](#)

DynamicW - May 6, 2024, 12:57 pm

Here is a list of the methods, some of them are just random and outdated but maybe useful for someone idk..

You need to buy the attachment below for 20 bytes and then it will give you 30 methods to get someones ip

SIM-1337 - May 6, 2024, 2:19 pm

Wow, amazing tips, like #12, which basically says "Use a program to fetch their IP". Lmao

41B41TR055 - May 12, 2024, 10:35 am

hope it will work for me

Mikitin - May 13, 2024, 8:05 am

what kind of shit is he posting xxx

groovycosine301 - June 7, 2024, 3:07 am

You need to buy the attachment below for 20 bytes and then it will give you 30 methods to get someones ip
so you're charging bytes for a half not working method list

account_ - June 7, 2024, 3:26 am

save your bytes, here you go.

Here is a list of the methods, some of them are just random and outdated but maybe useful for someone idk..

- 1 - Use a pre-made IP logger like these two most famous: Grabify and IP Logger
- 2 - Create a Gmail account and let the victim login, once they login, go to that account, scroll down until you find a details button and you will see their IP in the IP logs history (make sure you use a VPN cause if they know about this they can also get your IP address)
- 3 - Make them share screen and ask them to go to a website that shows their IP address, like for example the method I showed before
- 4 - Make your own website and use an IP Logger script, you don't need to make one, just grab a free website template, a free domain and a pre-made IP logger script, it will be more trusted to use this instead of the grabify or IP logger, since them links are very famous
- 5 - Create a fake steam account and activate steam guard there, then let them login saying you giving a free steam account with games, and when they login you will get the steam guard code along with the victim IP address on your email

6 - Create a fake Netflix account and let them login, then go to IP logs history and get the victim IP

7 - If they play GTA v you can get them to share screen and go to social club, network and the IP address will appear

8 - If they play Black Ops 3 just make them share screen and go to settings and networking the victim IP address will appear there

9 - If you in a ps3 game, ps4 party or Xbox party use a sniffer to get the IP address of everyone in that party, if you using ps4 I recommend console sniffer, if you using an Xbox I recommend re-lanc remastered or re-lanc v

10 - Do a fake discord verify that for the person to be member needs to go to an IP logger link and then you save is IP address

11 - Use a Discord Token Grabber you will get the victim IP and discord token

12 - Use a .exe or .py IP grabber

13 - Create a fake epic games account and enable 2fa then give them the account you will get their IP on your email along with the 2fa code

14 - If they don't know anything about PC's just ask them to search my IP on google and tell you the numbers, saying it's for something they need (just be creative)

15 - If you can go to the victim's house just connect to their internet and search my IP address on google

16 - Teach the victim how to do a free DDoS attack and make a stressthem account for him, then when they login just go to login history and you will get the victim IP

17 - Do a fivem server and make them join, and you will get their IP on your database

18 - Do a CSGO server and make them join, you will get their IP since they connecting to your server

19 - Search for their email or username and try to find if their stuff was ever leaked that way you can be lucky and get their IP and information

20 - If your victim plays or played Minecraft search their username in a Minecraft database leaked

essbee089 - June 10, 2024, 7:51 pm
nice thank you very much

Pinguuuu - June 11, 2024, 4:57 am
hope will work with me

HF.Psych - June 11, 2024, 7:58 am
With most of these you might as well just ask them for their IP. If they're dumb enough to do these things they surely they'll hand over their IP.

webpilottester - June 12, 2024, 1:27 pm

Hi

I need to send this so I can access your list

testmahack009 - July 18, 2024, 5:24 pm

Thanks I will take a look

mixer - July 19, 2024, 1:42 am

all you need is a vps with a web server hosted on it (like nginx), send them an email, make them visit your website. you don't even need to write any script the webserver will log their ip address. you can even set up your server as a reverse proxy and just redirect them to any website you want.

boleii466 - July 24, 2024, 3:52 pm

run zphisher, tell them its a fake phishing website that works, get them to input some random trash to prove to them it works. zphisher saves the ip address of the machine accessing the website in a local file

Zellow - September 6, 2024, 8:37 pm

Not worth wasting your bytes on this one..

pompiszon - September 18, 2024, 5:29 am

can u send me for free? no bytes ?

Dimbl - September 18, 2024, 12:12 pm

wow this is less than worthles

BrothaMike - September 18, 2024, 7:03 pm

awesome dude thank you

Lbawye - September 19, 2024, 3:28 am

I assume this isn't worth my time. all options are very accessible.

Dex37 - September 19, 2024, 11:28 am

Thanks for the methods, anyway 20 bytes are not worth it

ANNIE745 - September 20, 2024, 5:15 am

Imma try it

TheOracle35 - October 4, 2024, 10:22 pm

sorry it was not that useful and a lot of normal information.

GlassAlluminium - October 9, 2024, 1:09 pm

Amazing, very good tutorial. Now im a pro haker.

medamineeeeeee - October 15, 2024, 5:35 am

tnx bro i am so happy bc of you

User228183 - October 16, 2024, 3:53 am

20 - If your victim plays or played Minecraft search their username in a Minecraft database leaked

explatex - October 17, 2024, 12:51 am

thanks I will have fun

Toys - October 24, 2024, 10:49 am

lmao #12 is so stupid how is that even on the list

SCUMO - October 25, 2024, 2:16 pm

thank you for the tips!

yummy_du - November 1, 2024, 6:55 pm

praying it works... but from teh comments, kinda sus, tbh.

DramaKing - November 2, 2024, 5:01 am

(Nov 1, 2024 06:55 PM)yummy_du Wrote: [\[CITE\]](#) praying it works... but from teh comments, kinda sus, tbh.

There are pretty dumb methods, but you can often find something that works. It's just that logging IP addresses is pretty pointless unless you just want to know a general area that someone is from, and they don't use a VPN or proxy.

pabipi1332 - November 3, 2024, 5:48 pm

lol what a genius post

kissmyasthma95 - November 4, 2024, 1:02 pm

cheers mate, appreciate it

Merci pour le partage mon ami

ciadiscret - June 2, 2025, 11:34 am

bad and naze method 1/20

Mooooookie - June 2, 2025, 12:01 pm

Not really impressed with this list of '30' .. I would save your 20 bytes, not even worth that much.

HerrWinston - June 5, 2025, 10:34 am

(Jun 7, 2024 03:26 AM)account_ Wrote: [CITE](#) save your bytes, here you go.
