Thread: [Simple form filling bot. \(Maybe selenium would be a good option to make this?\)](#)

Jwett - May 6, 2024, 7:03 pm

Need a bot that can fill my custom entered data to the destined boxes and pause for me to.

We will start with a list of only about 10 simple sites only 2-3 of which have a captcha (I would like for the bot to pause at captcha for me to fill)

once we get that perfect I will pay per website to add more sites to my list.

I essentially need a more efficient google form filler.

Example of the data being filled custom: NAME, ADDRESS, PHONE NUMBER, email

EXAMPLE OF DATA I WILL NEED RANDOMIZED AND ENTERED BY THE BOT (ONLY A FEW THINGS): username, password (doesn't need to save the information i won't need the logins)

Some info will be static as well (same for all runs)

who can do this? PM me your telegram lets talk business.

I have something like this already built out, drop me a message if you're interested.

Mald0r0r - May 7, 2024, 5:28 am

I can do this. Sent you a PM
