Thread: [are https better then http?](#)

Thatmansgood - May 8, 2024, 7:17 pm

so im asking a question and that question is that what is better https or http because i heard that https is more secure then http.

Charlie Sheen - *May 8, 2024, 8:08 pm*

Yes, https is more secure than http.

SIM-1337 - May 8, 2024, 9:16 pm

The S in HTTPS literally stands for "Secure". The main difference between the two is that HTTP is unencrypted while HTTPS is encrypted.

SpyDrone - May 9, 2024, 5:19 am

Yeah it is, HTTP is literally unencrypted so it's not secure, no.

G?df?t?? - May 12, 2024, 5:30 pm

HTTPS is considered more secure when compared to HTTP due to its ability to encrypt all data exchanged between a client and server. This is in contrast to HTTP, which transmits messages in plaintext, making them vulnerable to interception by unauthorized individuals. By utilizing TLS (SSL) to encrypt and digitally sign HTTP requests and responses, HTTPS provides a safer platform for users to share sensitive information such as credit card details, addresses, and contact numbers. So it is recommended to use HTTPS when available.
