here are some AI generated images of a super tired nerd:

^ made with Bing image creator

GPT missed the mark on spelling, if you are a tired nerd you are "nired" apparently:

There is a critical moment here where in about 20 mins ill be "up" but i could just as easily go back to sleep.

I woke up at 530am today but usually I wake up anywhere between 630-830am.

Cool images as always!

Don't forget, sleep is for the weak.

Spoiler [\(Click to View\)](#) I'm hella weak

I am going to transition back to YouTube scrolling in bed and see what happens :)

[Gabriella](#) not up yet so might as well sleep for another hour

I haven't gone to sleep yet since yesterday. It's now 6:30am and my eyes are a bit heavy, but still have a few things to do after I get off here, then will likely pass out for a half hour to 45 minutes, and then im right back at it.

I can't be the only one that gets a productive feeling when you wake up early not having too head out to a job. Slowey throughout the day that productive feeling turns into procrastination tho :D

Haha, you already know! While every one is closed eyed, and sleep.. I'm red eye'd and half awake, pushing posts. I'm soo close.. ugh, but not there yet. Hopefully within the next week or so.

Maybe it is combination of Nerd + Tired?

I didn't go back to bed but I laid down for about 10 minutes, then my fiance woke up and we cuddled. I just got back from a walk down my street to a suburban corner store deli type of thing -

ate breakfast just now & I am coffeing up as I type now.\

Depends on the day for the procrastination part, but yes - love this feeling of being up early. It's 730, I got some time before I'll head to bank for 9am, then taking a train to go a few towns over to see my parents & godparents for a couple hours. Then back home, afternoon to do whatever! going to crank out a resume update & send out more applications :)

Yes! She is my fiance :)

Approved to be here on HF but she hasn't logged on in a while now

haha I had to get off the computer. I tried making posts too early and it was a STRUGGLE. I'm drinking coffee now though & ate some breakfast

Nah, that's freaking awesome! Feels so good having your other half having same interests / hobbies as you.

Need a small favour if that's okay with a new avatar if that's okay? Will shoot you a PM.

Bottom one is more accurate. I need to get back to work...

Euaggelistes - May 11, 2024, 5:23 am

There's some serious nerd "bed head" going on in image four from bing! Thanks for sharing.

diablospartan - May 11, 2024, 10:02 am

Well great images and looks very well

In my opinion sleep its very important but not too much

Life its to short and time its very important to lose it sleeping a lot

I hear people who sleep 9 to 10 hours per day and i tell them : wake up my man you are wasting your life

I ended up passing out a little over an hour after getting off the site. I have some obligations that I have to tend to every morning around 6-7am, so I usually stay up until then to knock those out, then I'll pass out for a little bit, then I'm right back at 'em!

Nice nice, this morning we were up at like 630, but we went back to bed by 7 something and then I just woke up now a bit before 10am here.

Ah, as you're going to bed, I'm just waking up. I use to enjoy staying up and considered myself a night person. As I've grown older, staying up takes a toll on my body. I've become accustomed to starting my day early, and going to bed later in the evening.
