Thread: [Desperate genius](#)

empleat - May 11, 2024, 3:09 pm

I would ask mods to not remove it: i linked evidence for my claims. Because it is important everyone should know this. Everyone to the last person in the world should be educated about this and things like unit 731. I am genius philosopher!

Don't know where to turn to I can prove my claims:

<https://www.quora.com/Is-there-someone-with-IQ-above-160-I-can-send-you-1000-pages-of-convo-with-160IQ-no-one-under-160IQ-understands-me-I-am-absurdly-alone>

Almost no one under 160IQ understands me! I have profound overexcitabilities i am 2E.

I want to talk about consciousness and nature of reality! There is no ultimate proof, but not knowing for sure doesn't mean it is not true. Biggest geniuses that ever lived thought that consciousness was eternal (Schopenhauer, Nietzsche). Then there would be no end to painful deaths and tortures!!! But no one is talking about this, as it is so terrible no one is able to even consciously consider this (BECAUSE HOW HORRIFYING THAT IS)!

Nietzsche said: life is so terrible it can exist only based on lies and who would come to know full truth of reality would perish: <https://scholarcommons.sac.edu/cgi/viewcontent.cgi?article=1052&context=philosophy>

Schopenhauer saw life as it was: suffering always outweighs pleasure, if you don't believe this look in nature to respective pleasure predator is getting from eating its victim and suffering of prey!

I had divine mania i experienced suffering of whole world as it would happen to me, i am empath (emotional overexcitabilities). I Am extremely sensitive my 160IQ friend with which i chatted over 1000 pages told me and ex-mensa psychologist nice 60 years old lady, 30 years experience, 3 phds. that i experience life at peak of human experience!

I am so alone no one in the world can fully understand me also because limits of metaphorical language to communicate qualia.

To quote Nietzsche: "It hurts me frightfully that in these fifteen years not one single person has 'discovered' me, has needed me, has loved me," a letter reads. "How rarely a friendly voice reaches me!" another adds. "I'm now alone, absurdly alone."

Why strongest guy in the world "David Goggins" is highly delusional and random loser 36 on internet knows about eternal torture? <https://www.youtube.com/watch?v=LOC0BP4cGvs> And I never heard any genius or high level scientist to talk about this. Like Donald Hoffman, Bernardo Kastrup, Tom Campbell, Roger Penrose even if it immediately flows from their own theories LMAO!

It is so terrible no one can even consciously be aware of this i claim. Because evolution hides truths unless they coincide with increased chance of survival and species which saw close to what reality is all perished! Evolution is random mutations on microscopic level and what we observe in

organism is determined what works on macro level...

Look how insanely cruel life is: all medieval tortures like: brazen bull, insect boat, skinning in front of mirror, even in 19th kids were chopped hands for being hungry and stealing bread and ppl were castrated and murdered for epilepsy and last witch burning was in 20th, not to mention worst atrocities Japanese committed during WW2 (google unit 731) and Japanese and US government went hush hush... 99.999% ppl are emotionally flat as sea and not even capable of empathy. We cure depression what is natural evolutionary adaptation if something in our environment is wrong by pills... Even idiots of scientific forum believe in chemical imbalance and banned my post...

Why everyone isn't working to prevent eternal suffering even we are just bacteria and probably never could do anything "chilling" but still we need to try, but ppl are irrational actors...

No one is able to even consider this might be the truth.

"truth goes through 3 stages, 1st it is ridiculed, then it is violently opposed and last it is accepted as self-evident" "a man mistakes his limits for limits of the world" - Schopenhauer

Donald Hoffman came to same conclusion using mathematical theorem based on theory of evolution that after millions of years evolution we see 0% of reality as it is, but he is again 100% overpositive and not seeing harsh realities of life: <https://www.youtube.com/watch?v=xWu5S4AFf5w&t=2255s>

Merely by existing you are causing suffering to other beings as you have to eat and compete for resources. Life is zero sum game in most important aspects everyone needs like girlfriend, or jobs... Evolution is random indifferent it doesn't care it is causing astronomical suffering... Not to mention most ppl are primitive animals driven only by power and status and short term rewards... And manipulate truth to sell it to other instead of trying to get to the truth and try to push their truth to world to make it reality. 99.999999999% of reality is shared hallucination...

Absence - May 11, 2024, 4:12 pm

This just seems like a lot of stuff to say to justify being unhappy. If life is a cold beast, and lets assume you have all the workings of the average person, your understanding of it should be an advantage, not an excuse to be miserable.

The rest of it, I don't really know what your scratching at. Life is only terrible when I don't make choices that make it better.

Hope you are able to figure out whatever "truth" it is that makes you want to be happy; the world is full of people who choose to be unhappy, intellectual or not.

OMG not going to even react to something like that... I get bullied from 140/150IQs but 160IQs tell me i am extremely intelligent... All i can say read 160IQ convo if you don't believe me (noone reads

proof and starts ad hominem and logical fallacies always) it is 1000 pages and it is hard to select something as we had very unique convo beyond lines and it was copy-pasted from reddit hard to read and without context. Even at mensa from .pdfs and other sources: it is even more important to have same experiences for understanding, as metaphorical language cannot express qualia: <https://explorinyourmind.com/irvin-yalom-and-his-four-existential-concerns/> There is also 114 comments or quora with brilliant engineer reality-istic

if it was so simple don't you think i wouldn't see it. I read Schopenhauer, Nietzsche, Goethe, Slavoj Zizek, Hegel, Kafka, Camus, Kant (Every major philosopher even not perfectly as i struggle with heavy chronic pain 8 years, but without knowing anything i could quickly understand most important stuff) don't even remember i am demented...

You are not even receptive! That is the thing, your sub-consciousness immediately protects you it is terrible to be only one who sees it in world of walking dead.

Watch real ones how life really is (Schopenhauer wasn't even pessimist BTW as Nietzsche knew, "pessimist is an optimist with facts" he was one of most compassionate and perceptive ppl that ever lived these are most depressed like Tolstoy which realized only most corrupt/evil ppl get to power):

You said ALL of that, to say that? Like, what was the purpose of your post? You really want us to believe you're a genius philosopher? I mean.. whatever helps you sleep at night dude, I'm not here to shut down your dream. But if you haven't already, since you're new.. take a moment to review the [Help Docs](#), so you can be familiar with the rules on the site.

Something else you might consider, is upgrading your account. You can read about that, here: <https://hackforums.net/upgrade.php>

Good luck with trying to be overly smart.

Jamika - May 12, 2024, 12:16 am

Excuse me but who told u that ur genius from first?

diablospartan - May 12, 2024, 12:32 am

My man maybe you are a genius who knows

But let me tell you that beying a genius its not ok as majority of them are sad and a little crazy plus they move in the wood

So i dont see a great life by beying a genius and i prefer to be a little stupid but happy

So if you are a genius my man stop beying one and try to enjoy life as it is and stop thinking to much and put so many questions as genius do because you can make a scurt circuit in your brain and it can take fire :)))

Chung - May 12, 2024, 1:51 am

So glad we're blessed to have a genius/crazy AF with us at HF. Welcome to the forums :S

What if we had the ability to modify the IQ of an ai program?

I agree with you that life and the world to be is nothing but causing suffering. That's the name of the game because if you're not suffering you're not being productive enough.

Euaggelistes - May 12, 2024, 12:53 pm

Welcome dear genius. Remember that we're mere mortals here at HF and eventually we'll hack your brain and take your IQs and replace them with PCBs.

You're most welcome, senior.

Kify - May 12, 2024, 6:09 pm

Am I the only one who can't read past the first paragraph or did TikTok indeed fry my concentration capabilities lol

Joy™ - May 13, 2024, 11:13 am

If you actually do have a 160 IQ look up John McAfee and Michael Malice. They both have around 170 - 180 IQ. Their IQ's are not recorded but I can judge pretty well because they're smarter than people with 150-160 (Jordan Peterson). Also, my dad has a recorded 156 IQ, his other two brothers have 145 and 140 (my uncles on his side of the family). My dad and uncles IQ got recorded when they were kids in school, I think. (my grandma told me about it - their mother).
